

G105-D3167 for Roller Peel Resistance of Adhesives

Test Device Requirements – ASTM D3167 specifies test fixtures for the roller peel resistance of adhesives. The G105 fixture meets these requirements

This standard gives detailed dimensions of a suitable roller drum peel test fixture for use with testing adhesives. As specified in the standard, the grips are of the self aligning type and the grips engage the outer 1 inch of the flexible adhesive when the load is applied.

G105 Test Fixtures are made to order per exact requirements
